- Battery charger in series.

Let us tell you about our technology:

“ **The Lineo is the best for cleaning air / water line, gutter grates and your sanitary facilities.**

The Lineo robotic brush is perfect for cleaning surfaces that mix air and water and are difficult to clean. Its rotates at more than 200 rpm unclogs the surfaces biofilm. Biofilm is a more or less complex multi cellular community of micro organisms (bacteria, micro-fungi, micro algae or protozoa), adhering to each other and to a surface. It is very important to eliminate it for the purpose of ultra disinfection. ”
