

MINI 1M DISTANCING ALERT

Everywhere
indoors and
outdoors

STOP
COVID-19

SECU-TAG'S STRONG POINTS

The company adopting the solution provides each employee with the Secu-tag (light device only 53 gr, 9 x 4.8 cm and less than 1 cm thick), capable of determining a relative distance between them and another, warns the user by sound and vibration that there is a possible hazard. Authorized personnel have access to a convenient web-based dashboard that allows you to easily reconstruct all contact events, view interaction and assembly statistics, and optimize flows and processes to minimize the risk of contagion. In the event that, unfortunately, one of the workers shows symptoms or is positive of Covid 19, the system allows you to reconstruct the contacts they have had and the relative exposure times to quickly put colleagues at risk. completely safe.

Secu-tag is ready to use and without any infrastructure. It can operate in the cloud or on a local network and is available both in stand-alone mode and in conjunction with smartphones. A system with very simple operation and possibility of customization according to customer needs.

SOUND ALERT:

- Constant distance **detection**
- constant analyzes
- Immediate reaction
- Cloud synchronization
- Auto mute
