HEXAGONE

MANUFACTURE

Your equipment of tomorrow
is already here...

www.myhexagone.com

Over 32 years of existence, almost 10 years have passed since Hexagone took a new turn, that of technology and extension of its catalogue in order to offer appropriate, reliable and intelligent equipment for public and collective pools.

Hexagone set the mission: to improve the working conditions of its clients through innovative products, that respect human and the environment, so that **technology is only useful for helping people!**

The equipment of tomorrow is already at Hexagone, with 12 new products for this new mission:

- 1/ To fight against the biofilm at the bottom of the basins and to reduce the chloramines and THM
- 2/ To clean regularly the buffer tank to simplify the emptying
- 3/ To help to suck under a mobile floor with a robot
- 4/ To navigate in a bio pool filled with algae
- 5/ To fight against sediments on gratings and in gutters
- 6/ To improve the life of lifeguards with a 360 ° platform, design and comfortable
- 7/ To provide super-resistant gutter gratings, free of heavy metals and anti-slip
- 8/ To create chlorine in the technical room of the swimming pool rather than transport it on the road
- 9/ To stop the users so that they all take a soapy shower before entering the water
- 10/ To take care of a fast and redundant information diffusion for the pool team in case of problems
- 11/ Challenging energy costs by adding a cover over swimming lines
- 12/ To take the robots out of the water and go clean synthetic lawns

Faithful to our demarche of free demonstrations, Hexagone goes to travel in your centres to meet you and present you the pool of tomorrow, more than ever intelligent, communicative and effective.

Thanks to you, Hexagone is present in more than **70%** of French public swimming pools. This honours us and obliges us.

We hope that you will find solutions to your problems in our new catalogue. All of our 75 employees are at your disposal to advise, demonstrate and keep track of your products.

At your service,
Your very devoted

President of Hexagone Manufacture, Mabis Group

NEW!

The assurance of effective and precise cleaning via a gyroscope

Fruit of the experience on the market of public swimming pools robots

Short or intensive program cycle, bottom or bottom / walls

Double ultra-filtering large capacity bags

Can be delivered with trolley and remote control

Sophisticated and elegant design

Our designer: Jan Bujak

The new **Crocodile Rock** robot comes from Jan Bujak's design studio, which regularly works with Elon Musk on the hyperloop project or with the Volkswagen group.

His signature now crowns our robot **Crocodile Rock**, with a powerful design, embodying sportiness, dynamism and emotion, for a high-end model.

Heat, ventilate, dehumidify

your shelter

3 versions:
fuel, natural gas
or propane

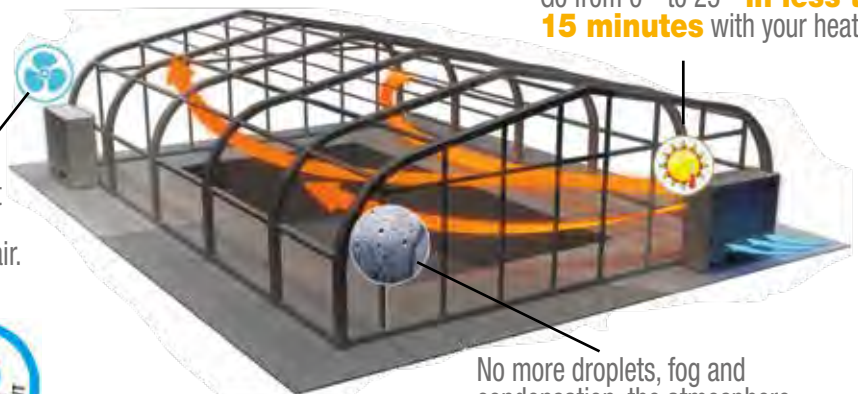

Available in
several colours
on request

Easy installation
outside your
shelter

Go from 0 ° to 25 ° **in less than 15 minutes** with your heater.

In summer, your shelter is not an oven, the heater provides ventilation with a temperate air.

No more droplets, fog and condensation: the atmosphere is always pleasant and healthy.

Non-contractual photos.

Heats in winter, ventilates in summer

Dehumidifies and fights droplets

Swimming possible all year round, assured comfort

Regulated temperature with minimum energy cost

Fast delivery and commissioning
