Your Designer: JAN BUJNAK

The new Crocodile Rock robot comes from Jan Bujnak's design studio, which works regularly with Elon Musk on the hyperloop project or with the Volkswagen group. His signature now crowns our robot Crocodile Rock, with a powerful design, embodying sportiness, dynamism and emotion, for a high-end model.

HEXAGONE QUALITY, TESTED FOR A LIFE OF USE OF 15 YEARS*

The first Hexagone robot was developed and presented at the French Swimming Championships in 1987.

It was a great robot, the S20, with incredible power.

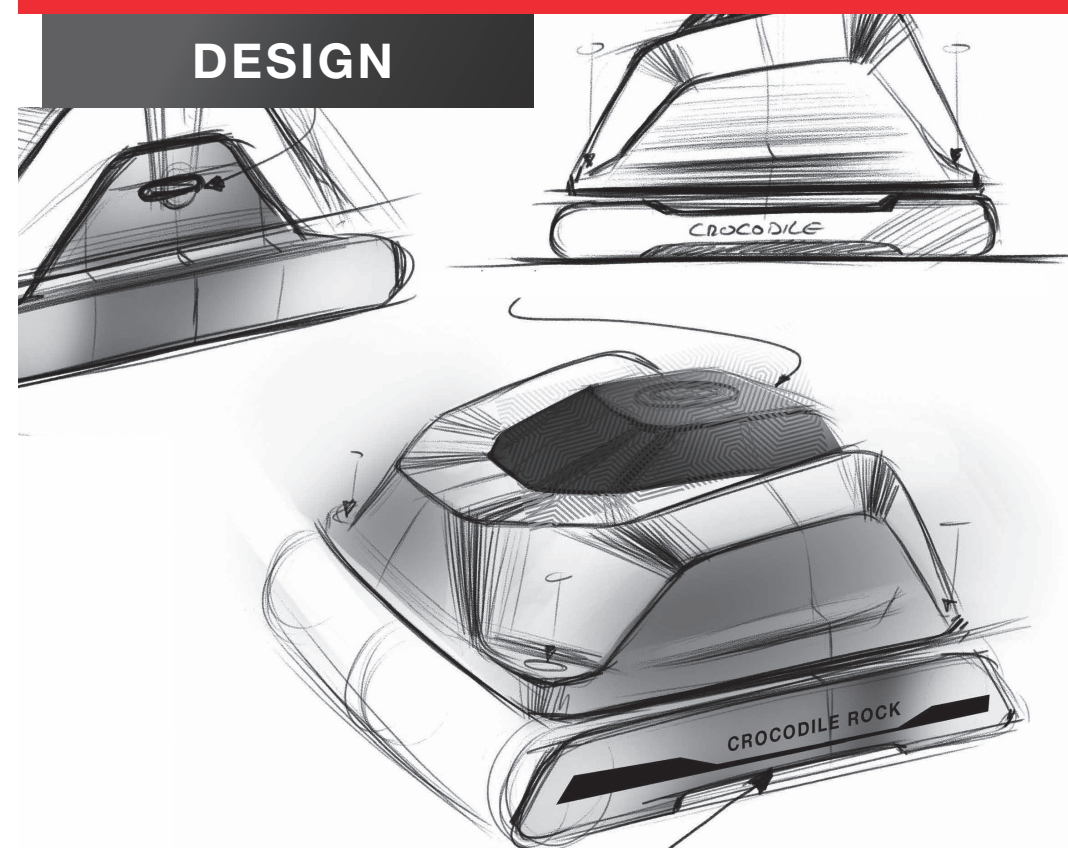

It embodied the promises of the French brand to offer a machine made of power, robustness and ease of use.

Crocodile Rock is a new robot embedded with our DNA inherited from many years of experience gained in municipal pools and water parks.

Crocodile Rock is force of remarkable power. The trusted leading brand in Europe for public pools.

*Based on 120 cycles per year, see manual

DESIGN

DURABLE

INTELLIGENT

DESIGN & KNOW-HOW

Audacious, without complexes and elegant, the new Crocodile Rock offers something different in a world dominated by conformist design and the pursuit of an ordinary product.

Its design has strong features, structuring, reminiscent of its wild animal instinct.

Its LED arm will dominate your pool for the pride of its owner.

An exceptional technology performed with elegance.

CROCODILE ROCK

PROFESSIONAL TECHNOLOGY

Crocodile Rock's DNA combines the performance of a central-engine axial turbo pump with **Dual Bag**, filtration, with double finesse for exceptional cleaning quality.

A gyroscope coupled with a unique positioning algorithm that multiplies its possibilities without adding any complexity.

An automatic mode that makes an unprecedented leap forward.

An overpowered **microprocessor** that performs twice as fast in **automatic pool learning** and pushes the boundaries of what a robot vacuum cleaner can do. The capabilities of this robot are **similar to so-called professional robots**.

Crocodile Rock pushes the boundaries of compromise.

PRECISE & RELIABLE

- Double filtration **Dual Bag**: 5 microns super fine and 100 microns for large debris
- Cable winding protection technology, **Gyrotwist** technology
- On-board mapping memory thanks to its **Aqua Positioning Technology**
- Full filter indicator **Hexabag**
- Detection of the AIR / WATER line **AmperO' Probe**
- Safety to protect the robot **Watercontrol**
- Management of the trajectory by its **Gyroscope**
- Detection of obstacles and walls via its **Angle Sensor**
- Auto check with intelligent maintenance **AutoCheck**

The robot that will never betray you.
