On site chlorine solution

**Simplicity
Ecology
Security!**

ELECTROLYSER PURE CHLORINE

Transforming salt into chlorine
Directly into your local area
Technical, 3 advantages:

- 1** Operating Cost reduced
- 2** No manipulation chlorine
- 3** No alteration of the quality chlorine

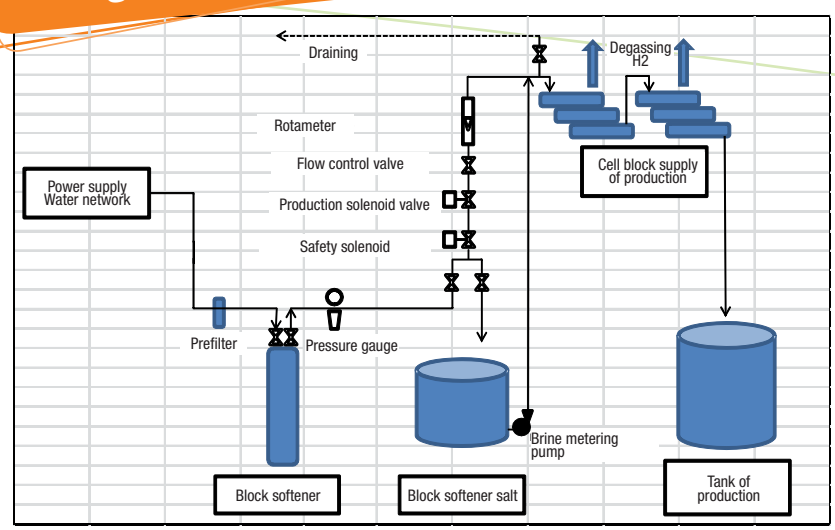

Diagram and production principle

Producing chlorine in situ is now possible. The Pure Chlore system offers an alternative to using commercial chlorine. The security for the storage of chemicals in swimming pools refers to multiple aspects, technical prevention, respect for safety regulations, staff training. During its work, the technical staff of a pool is exposed to chemical and physical dangers. These dangers can be limited with the Pure chlorine system. No need to take stock of chlorine gas canisters of chlorine granules, powder or liquid. Beyond the prevention of risks, **it is also the assurance of autonomy and certainty of a beautiful, healthy water, disinfected and disinfected.**

TECHNICAL DATA	Pure chlorine electrodes 3	Pure chlorine electrodes 6	Pure chlorine electrodes 12
For pools up to	300 m ³	600 m ³	1200 m ³
Electrodes Production	3	6	12
Chlorine Production Capacity	2,9 kg/day	7,6 kg/day	15,1 kg/day
Production volume tank	250 liters	250 liters	250 liters
Salt consumption (1 kg chlorine product)	3 kg	3 kg	3 kg
Alimentation	220 - 240 VAC mono	220 - 240 VAC mono	220 - 240 VAC mono
Warranty	2 years	2 years	2 years
