Processing and analysis solution for commercial pool

Training is included!

AMPEROMETRIC pH/CHLORINE REGULATOR

Hexa Chlorine / pH control is aimed at demanding users. The regulator takes an amperometric chlorine measurement with two injection thresholds and two another injection thresholds for pH.

6 cm high display in 2 different colours.

Ideal for use in dark machine rooms.

HEXA CONTROL

Chlore/pH amperometric regulator

Reliable measurements, precise control, easy operation.

Included in the kit:

Copper/ platinum probe for chlorine

Universal pH probe

Photometer PC 03

It provides digital results for three key parameters of pool disinfection control

- Chlorine, pH and Stabilizer (Cyanuric Acid).
Colourimetric analysis gives fast and accurate digital results.
Waterproof with a large backlit LCD screen.
Easy to use with four buttons.

Photometer PC 09

It allows the analysis of nine tests (chlorine, pH, CYA, TA, CA, TH, OZ, CU, BR, FE) associated with management of a swimming pool or spa.
Direct access by a single button to all parameters and fully waterproof.
Downloadable and shareable data via Bluetooth or USB SMART key.

Municipal toolkit

Colourimeter, comparator, discs, 6 functions.
Square cylinders, and accessories.
Chlorine, pH, TAC, TH
Calcium and Stabilizer (Acid Cyanuric) analysis.
WORKS WITH THE DPD TABLETS.
