**Internal alert solution in commercial pool**

## SPECIAL POOL ALARM

Spartel is a new means of rapid communication between secure and relevant staff of the centre. Protected by international patent. It is always complicated to inform quickly and simultaneously the different areas such as locker rooms, pool, cash-desk and equipment rooms.

The walkie-talkie, radio systems, or phones can provide communication possibilities, but are often set to different channels giving various information and unclear orders. To ensure the smooth flow of clear information, Hexagone has developed the first independent wireless system network.

### A panic button:

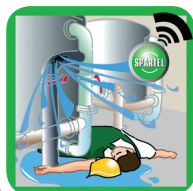

**To warn at the poolside**  
during a rescue procedure...

**To warn in a sauna or spa**  
unsupervised during use...

**To warn at the cash-desk**  
during an attack...

**To warn in changing rooms**  
to ask for help...

**To warn in technical facilities**  
in case of fall or spill...

### Simple wireless system!

**1 button panic**  
on battery

**1 alarm box with**  
customizable verbal  
warning or information

(The box shows the panic button number that has been triggered).

#### TECHNICAL DATA

|   |
|---|
| Remote control                          |
| Battery life (and radio control button) |
| Range radio                             |
| Protection / Structure transmitter      |
| Housing                                 |
| Optional power supply                   |
| Dimensions                              |
| Housing protection                      |
| Guarantee                               |

#### Spartel housing

|                             |
|-----------------------------|
| Button cell 3.2V            |
| About 6 months              |
| 100 m (open field)          |
| IP68 / shockproof structure |
| 220 V / 50 hz               |
| Solar panels                |
| 30 x 20 x 10 cm             |
| IP55                        |
| 1 year                      |
