

Anti-slip protection on tiled floors

Presta Grip is an invisible anti-slip against slipping on wet floors, limescale and dirt with a very long life. Presta Grip increases the slip resistance by means of micro-crystals, which are applied with a liquid and which penetrate the pores of your tiles / floor.

No visible or noticeable marks on the tiles.

The colour and structure of your floor remain unchanged.

The tiles are not attacked by an acid product or covered by another one.

European standard DIN 51097 - barefoot circulation area : Classe C

NORME DE GLISSANCE			
Angle d'inclinaison	DIN 51097	XP 05-010	
12° 	CLASSE A	PN 12	
18° 	CLASSE B	PN 18	
24° 	CLASSE C	PN 24	

APPLICATION PROCEDURE

1. We begin by pre-treating your floor with our special products.
2. We apply Gliss'protect and the crystals penetrate into the porous floor. After 5 minutes, the floor is flushed, it is **immediately accessible and usable**. Its implementation is very fast.
3. The exclusive Presta Grip system makes all tiles immediately porous.

Your premises do not have to close for us to apply Presta Grip, as we work outside of your opening hours. Thus, there will be no loss of sales or any additional costs.

STRONGS POINTS

- 3 years guarantee
- Economical solution, easy maintenance
- No change in colour or structure
- Anti-limescale and anti-bacterial product
